

***LUBRICATION ENGINEERS, Inc.***  
**LEADERS IN LUBRICANTS**

## **CERTIFICATE**

LE lubricants are suitable for use in all Atlas Copco air compressors provided the correct ISO Viscosity grade oil is used as per the OEM oil specification.

LE recommends taking oil samples for analysis every 3 months or 2,000 hours to monitor the oil condition and to establish a safe oil drain interval.

There are many successful Feedback Reports available on LE Inc's website for proof of performance in Atlas Copco air compressors.
