

**LUBRICATION ENGINEERS, Inc.**  
*LEADERS IN LUBRICANTS*

## CERTIFICATE

Lubrication Engineers, Inc. intends to comply with the requirements of REACH legislation. It is our desire to continue our good relations with LE International's EU distributors and customers now and into the future. LE Inc. has entered into a contract with H2 Compliance, a consulting company, to be our "Only Representative" in the REACH process. We have determined what substances need to be pre-registered and have submitted a list of those substances for pre-registration through The Redstone Group. These consultants will complete the pre-registration process for LE Inc. before the November 30, 2008 deadline.

After the pre-registration process, LE Inc. will continue to move forward with all activities necessary to insure full compliance with REACH legislation before any deadlines that may apply to LE, Inc.
